

AI Tools Kit

The best free and freemium AI tools for Godot, Unity, Unreal, Roblox, browser games and no-code, picked for beginners.

Part of the StarterLoot First Game Starter Pack. Edition: October 2026

How to read this: stars are our beginner rating (5 = easiest to start). "Verified" means we checked pricing on the tool's official site. "Pricing not verified" means we could not confirm it, so check the site before you rely on it. Prices change often. Full reviews and step by step guides live at starterloot.com/guides/.

> Godot

Free, open source engine. No built-in AI, so pair it with a coding agent through a community MCP server.

Godot

★★★★★

Free, open source 2D and 3D game engine with its own easy scripting language, GDScript.

Price: free (verified) · godotengine.org

No built-in AI assistant. Popular with AI coding agents through community MCP servers such as Godot MCP and Godot AI.

Godot MCP

★★★★☆

Open source MCP server that lets AI agents launch the Godot editor, run projects, read debug output and edit scenes.

Price: free (verified) · github.com/Coding-Solo/godot-mcp

Godot AI

★★★★☆

Open source Godot plugin and MCP server that lets AI assistants build scenes, edit nodes and scripts in a live editor.

Price: free (verified) · github.com/hi-godot/godot-ai

Claude

★★★★★

AI assistant that writes game code, explains bugs and builds playable prototypes.

Price: freemium, paid plans from \$20/mo (verified) · claude.ai

Claude Code, Anthropic's coding agent for the terminal, IDE, desktop app and web, is included in Pro (\$20/mo, or \$17/mo billed yearly) and higher. It is not in the Free plan (checked October 2026).

OpenAI Codex

★★★★☆

OpenAI's coding agent for the desktop app, terminal, IDE and web. It can read your project, write code and use MCP servers.

Price: freemium, paid plans from \$8/mo (Go, desktop app only) (verified) · developers.openai.com/codex

Supports MCP servers via `codex mcp add` or `~/.codex/config.toml`. ChatGPT Free and Go (\$8/mo) include limited Codex in the desktop app, subject to rollout. Plus (\$20/mo) adds the CLI, IDE extension and web (checked October 2026).

Cursor

★★★★☆

AI code editor with a built-in agent, plus a CLI and cloud agents, that writes and edits game code from plain English requests.

Price: freemium, paid plans from \$8/mo (Plus, Grok models only) (verified) · cursor.com

Free plan has limited agent requests. Plus (\$8/mo) includes Grok models only. Premium (\$30/mo) and up can use third party models like Claude and GPT at API list price from prepaid credit. Sold as part of The X Subscription (cursor.com/pricing, checked October 2026).

PixelLab

★★★★★

Generates pixel art sprites, characters and animations for 2D games.

Price: freemium. **Pricing not verified**, check the site. · pixellab.ai

Leonardo.Ai

★★★★★

Generates game art, characters and concept images from text prompts.

Price: freemium, paid plans from \$12/mo (verified) · leonardo.ai

> Unity

Free Personal tier with Unity AI tools in the Editor, a CLI and an MCP server.

Unity

★★★★☆

Popular 2D and 3D engine for PC, mobile and console games, using C#.

Price: freemium, paid plans from \$210/mo (Pro) (verified) · unity.com

Unity AI tools in the Editor, a CLI and an MCP server. The agentic assistant has a free trial, then \$10/month (per unity.com).

Unity AI

★★★★☆

Unity's AI tools: an in-editor assistant that understands your scene, plus a free official plugin, CLI and MCP server so agents like Codex and Claude Code can drive the editor. Needs Unity 6 or newer.

Price: freemium, paid plans from \$10/mo (assistant on Personal) (verified) · unity.com/products/ai

Claude

AI assistant that writes game code, explains bugs and builds playable prototypes.

Price: freemium, paid plans from \$20/mo (verified) · claude.ai

Claude Code, Anthropic's coding agent for the terminal, IDE, desktop app and web, is included in Pro (\$20/mo, or \$17/mo billed yearly) and higher. It is not in the Free plan (checked October 2026).

OpenAI Codex

OpenAI's coding agent for the desktop app, terminal, IDE and web. It can read your project, write code and use MCP servers.

Price: freemium, paid plans from \$8/mo (Go, desktop app only) (verified) · developers.openai.com/codex

Supports MCP servers via codex mcp add or ~/.codex/config.toml. ChatGPT Free and Go (\$8/mo) include limited Codex in the desktop app, subject to rollout. Plus (\$20/mo) adds the CLI, IDE extension and web (checked October 2026).

GitHub Copilot

AI coding assistant inside popular editors that suggests and writes code.

Price: freemium, paid plans from \$10/mo (verified) · github.com/features/copilot

Meshy

Turns text or images into textured 3D models ready for game engines.

Price: freemium, paid plans from \$20/mo (verified) · meshy.ai

Tripo

Generates 3D models from text or images, with auto rigging options.

Price: freemium, paid plans from \$20/mo (verified) · tripo3d.ai

Mixamo

Free Adobe service that auto rigs characters and applies ready made animations.

Price: free (verified) · mixamo.com

> Unreal Engine

Free to start. 5.8 documents Unreal MCP (experimental) for agents like Claude Code and Codex.

Unreal Engine

High end 3D engine with Blueprints visual scripting and C++.

Price: free (verified) · unrealengine.com

Unreal Engine 5.7 adds an experimental in-editor AI Assistant, plus the web based Epic Developer Assistant. Unreal Engine 5.8 documents Unreal MCP, an experimental built-in MCP server that agents like Claude Code, Cursor and Codex can use to drive the editor, and Epic publishes an official Claude Code plugin for it.

Claude

AI assistant that writes game code, explains bugs and builds playable prototypes.

Price: freemium, paid plans from \$20/mo (verified) · claude.ai

Claude Code, Anthropic's coding agent for the terminal, IDE, desktop app and web, is included in Pro (\$20/mo, or \$17/mo billed yearly) and higher. It is not in the Free plan (checked October 2026).

OpenAI Codex

OpenAI's coding agent for the desktop app, terminal, IDE and web. It can read your project, write code and use MCP servers.

Price: freemium, paid plans from \$8/mo (Go, desktop app only) (verified) · developers.openai.com/codex

Supports MCP servers via codex mcp add or ~/.codex/config.toml. ChatGPT Free and Go (\$8/mo) include limited Codex in the desktop app, subject to rollout. Plus (\$20/mo) adds the CLI, IDE extension and web (checked October 2026).

Cursor

AI code editor with a built-in agent, plus a CLI and cloud agents, that writes and edits game code from plain English requests.

Price: freemium, paid plans from \$8/mo (Plus, Grok models only) (verified) · cursor.com

Free plan has limited agent requests. Plus (\$8/mo) includes Grok models only. Premium (\$30/mo) and up can use third party models like Claude and GPT at API list price from prepaid credit. Sold as part of The X Subscription (cursor.com/pricing, checked October 2026).

Meshy

Turns text or images into textured 3D models ready for game engines.

Price: freemium, paid plans from \$20/mo (verified) · meshy.ai

Tripo

Generates 3D models from text or images, with auto rigging options.

Price: freemium, paid plans from \$20/mo (verified) · tripo3d.ai

Polycam

Scans real objects and spaces into 3D models using your phone.

Price: freemium, paid plans from \$30/mo (verified) · poly.cam

Blockade Labs Skybox

Generates 360 degree skyboxes and environments from text prompts.

Price: freemium, paid plans from \$20/mo (billed yearly) (verified) · blockadelabs.com

> Roblox

Roblox Studio is free, with a built-in Assistant and MCP server.

Roblox Studio

Free editor for building and publishing games on Roblox, scripted in Luau.

Price: free (verified) · create.roblox.com

Built-in Assistant (writes code, builds, generates meshes, materials and textures, playtests), Code Assist completions, and a built-in MCP server with quick connect for Claude Code, Codex CLI, Cursor and more (per Roblox Creator Hub docs, October 2026).

Roblox Assistant

AI helper built into Roblox Studio. It answers questions, writes and edits Luau scripts, builds objects, generates meshes, materials and textures, and can playtest your game.

Price: free. **Pricing not verified**, check the site. · create.roblox.com/docs/assistant/guide

Planning Mode, /generate_mesh, /generate_procedural_model (50 per rolling 24 hours), /generate_material and /generate_texture. You can add your own Anthropic, OpenAI or Google API key (per Roblox Creator Hub docs, October 2026).

Claude

AI assistant that writes game code, explains bugs and builds playable prototypes.

Price: freemium, paid plans from \$20/mo (verified) · claude.ai

Claude Code, Anthropic's coding agent for the terminal, IDE, desktop app and web, is included in Pro (\$20/mo, or \$17/mo billed yearly) and higher. It is not in the Free plan (checked October 2026).

OpenAI Codex

OpenAI's coding agent for the desktop app, terminal, IDE and web. It can read your project, write code and use MCP servers.

Price: freemium, paid plans from \$8/mo (Go, desktop app only) (verified) · developers.openai.com/codex

Supports MCP servers via codex mcp add or ~/.codex/config.toml. ChatGPT Free and Go (\$8/mo) include limited Codex in the desktop app, subject to rollout. Plus (\$20/mo) adds the CLI, IDE extension and web (checked October 2026).

Cursor

AI code editor with a built-in agent, plus a CLI and cloud agents, that writes and edits game code from plain English requests.

Price: freemium, paid plans from \$8/mo (Plus, Grok models only) (verified) · cursor.com

Free plan has limited agent requests. Plus (\$8/mo) includes Grok models only. Premium (\$30/mo) and up can use third party models like Claude and GPT at API list price from prepaid credit. Sold as part of The X Subscription (cursor.com/pricing, checked October 2026).

Meshy

Turns text or images into textured 3D models ready for game engines.

Price: freemium, paid plans from \$20/mo (verified) · meshy.ai

> Browser games (three.js)

Plain JavaScript in the browser. Let a coding agent write it while Vite runs a dev server.

three.js

★★★★☆

Free, open source (MIT) JavaScript 3D library for WebGL and WebGPU that runs games and scenes directly in the browser.

Price: free (verified) · threejs.org

No built-in AI. Works well with Claude Code, Codex or Cursor writing the JavaScript while Vite runs a local dev server (latest release r186, npm 0.186.1, checked October 2026).

Claude

★★★★★

AI assistant that writes game code, explains bugs and builds playable prototypes.

Price: freemium, paid plans from \$20/mo (verified) · claude.ai

Claude Code, Anthropic's coding agent for the terminal, IDE, desktop app and web, is included in Pro (\$20/mo, or \$17/mo billed yearly) and higher. It is not in the Free plan (checked October 2026).

OpenAI Codex

★★★★☆

OpenAI's coding agent for the desktop app, terminal, IDE and web. It can read your project, write code and use MCP servers.

Price: freemium, paid plans from \$8/mo (Go, desktop app only) (verified) · developers.openai.com/codex

Supports MCP servers via codex mcp add or ~/.codex/config.toml. ChatGPT Free and Go (\$8/mo) include limited Codex in the desktop app, subject to rollout. Plus (\$20/mo) adds the CLI, IDE extension and web (checked October 2026).

Cursor

★★★★☆

AI code editor with a built-in agent, plus a CLI and cloud agents, that writes and edits game code from plain English requests.

Price: freemium, paid plans from \$8/mo (Plus, Grok models only) (verified) · cursor.com

Free plan has limited agent requests. Plus (\$8/mo) includes Grok models only. Premium (\$30/mo) and up can use third party models like Claude and GPT at API list price from prepaid credit. Sold as part of The X Subscription (cursor.com/pricing, checked October 2026).

Spline

★★★★☆

Browser based 3D design tool with AI generation for interactive scenes.

Price: freemium, paid plans from \$15/mo (verified) · spline.design

Meshy

★★★★★

Turns text or images into textured 3D models ready for game engines.

Price: freemium, paid plans from \$20/mo (verified) · meshy.ai

Rosebud AI

★★★★★

Vibe coding platform that builds playable browser games from text descriptions.

Price: freemium (verified) · rosebud.ai

> No-code

Make a game by describing it or with visual events, no programming required.

GDevelop

★★★★★

Free, open source no code game engine with an AI assistant that helps build and fix your game.

Price: freemium (verified) · gdevelop.io

Built-in AI assistant and AI tutor that can answer questions and build game mechanics (per gdevelop.io).

Construct 3

★★★★★

Browser based 2D game engine that uses visual event sheets instead of code.

Price: freemium, paid plans from \$15.99/mo (verified) · construct.net

Rosebud AI

★★★★★

Vibe coding platform that builds playable browser games from text descriptions.

Price: freemium (verified) · rosebud.ai

Astrocade

★★★★★

Create and share small browser games by describing them to an AI.

Price: free (verified) · astrocade.com

Instaplay

★★★★★

Free browser AI game maker: describe a game in plain English, play it in seconds, and keep changing it by asking for edits.

Price: free (verified) · instaplay.ai

Google Playground

★★★★★

Describe a game in plain language and generate, play, tweak and share it in the browser with no coding.

Price: freemium. **Pricing not verified**, check the site. · playground.google

Puter AI Builder

★★★★★

Browser AI game builder from Puter that writes a playable HTML, CSS and JavaScript game from a description, fixes its own errors, and includes hosting, saves, leaderboards and multiplayer.

Price: freemium. **Pricing not verified**, check the site. · builder.puter.com/ai-game-builder

Unity Spark

★★★★☆

Unity's new browser-based AI game maker. Prompt a game, refine it in a web editor using artist-made Unity Asset Store assets, then publish it. Announced Oct 2026 with Google. Waitlist now, closed beta coming soon.

Price: unknown. **Pricing not verified**, check the site. · unity.com/spark

Built around AI: start from a text prompt and keep iterating with AI help, with publishing into Google Playground planned (per unity.com/spark).

> Art, audio and animation for any engine

Free or freemium asset tools that export files any engine can import.

Leonardo.Ai

★★★★★

Generates game art, characters and concept images from text prompts.

Price: freemium, paid plans from \$12/mo ([verified](#)) · leonardo.ai

PixelLab

★★★★★

Generates pixel art sprites, characters and animations for 2D games.

Price: freemium. **Pricing not verified**, check the site. · pixellab.ai

SpriteCook

★★★★☆

Generates and animates 2D game art from text prompts, in pixel art or detailed HD style: characters, items, tilesets, seamless textures, UI kits and sprite sheets. Works in the browser, by API, or from coding agents through its MCP server.

Price: freemium, paid plans from \$8/mo ([verified](#)) · spritecook.ai

Mixamo

★★★★★

Free Adobe service that auto rigs characters and applies ready made animations.

Price: free ([verified](#)) · mixamo.com

Suno

★★★★★

Generates full songs and soundtracks from text prompts.

Price: freemium, paid plans from \$8/mo ([verified](#)) · suno.com

ElevenLabs

★★★★★

Realistic AI voices for character dialogue, plus sound effect generation.

Price: freemium, paid plans from \$6/mo ([verified](#)) · elevenlabs.io

MyEdit AI Sound Effect Generator

★★★★★

Browser tool from CyberLink that turns text prompts into sound effects you can download.

Price: freemium ([verified](#)) · myedit.online/en/audio-editor/ai-sound-effect-generator

Kokoro

Small open-weight text to speech model (82 million parameters, Apache license) with 54 voices in 8 languages in v1.0. Lightweight, so it runs fast and cheap.

Price: free (verified) · huggingface.co/hexgrad/Kokoro-82M
